EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: In the abstract, lines 4 and 5, "means" was changed to – device --.

The following is an examiner's statement of reasons for allowance: The claims are not anticipated or deemed obvious over the prior art in which the invention comprises a tool having an electromagnetic clutch connected to a computing means connected to a sensor, wherein the clutch is controlled by the computing means using a process such that the clutch is repeatedly alternately opened and closed. The closest prior art teaches a clutch that is merely opened/closed in response to an overload condition. Further, the prior art fails to disclose "repeated alternately opening and closing" of the clutch in the process step.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
